Project

PHPStorm
rootstalk-theme
Project

Drush, Drupal 7
and more added
using bash via
bootstrap.sh

Code Changes

right click &
upload to localhost

vagrant up

Test Results

VirtualBox **Drupal 7 Development VM**
http://drupal7vm.dev or
ssh -p 2222 vagrant@drupal7vm.dev
for **testing**

Notes:

You **must** run *vagrant plugin install vagrant-hostsupdater* from a command prompt
on your host machine before your first 'vagrant up'!

Make **ALL** variable changes in the included **config.yaml** file! If you need additional
control variables please write to digital@grinnell.edu.
